Ireland container emergency power generation equipment

Overview

What is a containerised generator?

Our Containerised Generators deliver robust, high-capacity power from 300-3,000 kVA in secure, weather-resistant enclosures. Designed for challenging environments and critical applications, they offer noise reduction, easy transport, and bespoke configuration to meet your site's exact needs.

What is temporary emergency generation (TEG)?

Temporary emergency generation (TEG) has been installed at the request of CRU by ESB and others at a number of sites as a short-term solution to enhance security of electricity supply. These generating plants will be connected to the system for a limited number of years until new, enduring power generation plants are connected in the late 2020s.

How many MW of gas-fired Teg are there in Ireland?

In December 2023, 193 MW of gas-fired TEG was connected to the system at North Wall, Dublin. This plant can be at full output within 15 minutes and can supply 3% of Ireland's peak demand. A further 224 MW of TEG is available to operate at our site in Shannonbridge, Co. Offaly, since August 2024.

Is Ireland facing a 'Energy Trilemma'?

Utilities and policymakers around the globe are confronted by an 'energy trilemma', as they try to deliver on three fronts: improve energy sustainability through decarbonisation, ensure security and reliability of energy supply, while minimising consumer costs. Ireland faces these same challenges.

Ireland container emergency power generation equipment

[Emergency Response , Generators Ireland](#)

An emergency power generator makes up part of a backup power system, designed to activate during a power outage to ensure continuous electricity for essential operations. These diesel

...

[In commercial operation the 200MW power plant for Irish ESB](#)

Apr 30, 2024 · MYTILINEOS, in Consortium with GE Vernova completed the construction of the new gas-fired Temporary Emergency Generation (TEG) power plant in Dublin, Ireland within ...

[Success Story with DE Power, our Kohler](#)

...

We were proud to supply the emergency generator power package for this very prestigious Data Center project where only the best equipment from ...

[Temporary Emergency Generation](#)

With demand for electricity rising sharply in recent years, the Commission for Regulation of Utilities (CRU) announced in 2021 a suite of actions to enhance the security of Ireland's ...

Containerized Generators

Our line of containerized generators is easily configurable to the needs of any application, from rental to disaster relief to mining -- with a whole host of ...

Stationary and mobile container solutions for energy systems

In such cases, stationary container solutions provide a reliable and flexible option for power and emergency power generation. They are ideal for various applications, including data centers,
