Why are hydrogen stations important?

Hydrogen stations are crucial for the widespread adoption of hydrogen fuel. They provide the necessary infrastructure to refuel hydrogen-powered vehicles, making it easier for consumers to transition to this eco-friendly energy source. As the network of hydrogen stations expands, it paves the way for a cleaner, more sustainable future.

Are hydrogen fuel stations safe?

Yes, hydrogen fuel stations are designed with multiple safety features. Hydrogen dispensers include grounding mechanisms, breakaway hoses, and leak detection systems. The fueling process is automated with safety checks before dispensing begins. Stations meet strict safety standards set by the National Fire Protection Association (NFPA).

How does a hydrogen fuel station work?

Check hydrogen fuel station availability before you arrive to avoid delays. Hydrogen fuel cells generate electricity through an electrochemical reaction between hydrogen and oxygen, producing only water vapor as a byproduct. This clean technology powers your vehicle with zero harmful emissions.
