Balcony solar power stations, also known as mini-PV systems, are small "balcony power plants" that typically consist of a few PV modules.

How does a balcony power station work?

A balcony power station basically works like a large solar power system by converting sunlight into electricity. This electricity flows via a cable from the inverter directly into your socket and supplies your electrical appliances.

How does balcony solar work?

Just plug in! It's really that easy. "Balcony Solar" is a totally independent power system, so to use it you'll need to plug your devices directly into the portable power station and it basically operates like a giant battery.

Remember, every watt of electricity you generate from here is free fuel for your favorite device!
