

Japanese solar energy storage device processing plant

Overview

Who owns a solar power plant in Japan?

As the Japanese subsidiary of the global IPP Sky Solar, this company develops, owns, and operates utility-scale solar power plants. Their significant projects, like the 1.977MW plant in Kagoshima, contribute substantially to Japan's green energy supply.

Which solar power plants are in Japan?

Japan is also investing in other innovative solar PV technologies, such as space-based solar power and flexible perovskite solar cells. Setouchi Kirei Mega Solar Power Plant - located in Setouchi, Okayama, is the largest solar power station in Japan, with a generating capacity of 235 MW.

What is Japan's first energy storage project?

In 2015, we started Japan's first demonstration project covering energy storage connected to the power grid in the Koshikishima, Satsumasendai City, Kagoshima. This project is still operating in a stable manner today. One feature of our grid energy storage system is that it utilizes reused batteries from EVs.

How will Japan's photovoltaic industry grow?

With continued investment and innovation, Japan's photovoltaic industry is poised for unprecedented growth in the coming years. With a 9.2% CAGR, Japan aims for 117.6 GW PV capacity by 2030, backed by robust government support and projects like the Setouchi Kirei Mega Solar Power Plant.
