

Kapolei Energy Storage Project

Overview

What is the Kapolei energy storage project?

The Kapolei Energy Storage project is a utility-scale battery farm with a storage capacity of 565 megawatt-hours of electricity, making it the largest storage project in Hawai'i. It officially went online before the holidays after several delays.

Does Oahu have a battery energy storage system?

A 185 MW/565 MWh battery energy storage system (BESS) recently started operating in Oahu, Hawaii, providing balancing services to support the island's growing share of solar generation.

What is the largest energy storage project in San Francisco?

The Kapolei Energy Storage facility in Hawai'i is the largest storage project in the state, with a storage capacity of 565 megawatt-hours of electricity. It is under construction in 2022. The project's developer, San Francisco-based Plus Power, believes it is the first time a battery has been used by a major utility to balance the grid.

Will a storage battery help Hawaiian Electric deal with over-generation?

A storage battery project has not yet proven its effectiveness at scale, according to Bob Rudd, the chief commercial officer at Plus Power. The battery's capacity will help address the issue of clean energy curtailment, also known as over-generation, for Hawaiian Electric, Rudd said.

Kapolei Energy Storage Project

Kapolei Energy Storage

Kapolei Energy Storage (KES) is ideally located on roughly eight acres of land in Kapolei on the island of Oahu, where it interconnects at a critical Hawaiian Electric substation. The 185 MW / ...
