

Kuala Lumpur New Energy Storage Power Supply

Overview

In 2024, Malaysia launched its first large-scale storage initiative, known as MyBeST, to build four grid-connected battery systems of 100MW/400MWh each. What is energy storage system in Malaysia?

Outlook of energy storage system in Malaysia Energy storage is one of the emerging technologies which can store energy and deliver it upon meeting the energy demand of the load system.

Is Malaysia ready for energy storage?

(Photo: iStock) Malaysia is rapidly expanding solar and other intermittent renewable generation, creating strong momentum for energy storage. The country's first four large-scale grid-connected storage projects have attracted significant interest, with more than 20 companies submitting over 30 proposals.

Why is Malaysia launching a sodium-sulfur battery system in 2024?

By October 2024, Malaysia saw the deployment of its first sodium-sulfur (NaS) battery system at a large-scale solar farm in Kedah. This marked a significant step forward for the country's storage landscape, as the advanced NaS technology offers higher energy density and a longer discharge duration compared to conventional lithium-based systems.

Why is Malaysia expanding its energy storage facility in Kedah?

This significant expansion of its existing Kulim facility in Kedah state underscores Malaysia's growing strategic importance in the global shift towards sustainable energy and is set to power the regional demand for advanced energy storage solutions.
