

Liechtenstein backup UPS uninterruptible power supply equipment

Overview

What is an uninterruptible power supply (UPS) battery backup?

An uninterruptible, or uninterruptible power supply (UPS) works as a battery, surge protector and power inverter for household and office electronics.

Do you need a battery system to backup your ups power supply?

For mission critical applications, having a reliable battery system to backup your UPS power supply is essential to supporting your critical load during a power quality event.

What are UPS modules with capacitor storage?

UPS modules with capacitor storage are equipped with integrated electrochemical double layer capacitors. In case of a power fault they guarantee an uninterrupted power supply for several seconds. By using such UPS modules, processes can be completed and data saved, for instance.

What is a continuous power supply (UPS)?

UPS is the short version of "uninterruptible power supply". In many applications a continuous power supply is important because power fluctuations and outages can cause damage to control equipment as well as unexpected down time. This situation can lead to a loss of productivity and revenue.
