

Lima 3-input 1-output solar combiner box quotation

Overview

What types of solar combiner boxes are available?

We offer a variety of solar combiner boxes, including DC and AC. DC combiner boxes cover 1-24 input channels, support 600V/1000V/1500V system voltage, and current range 10A-400A. AC combiner boxes support low-voltage and medium-voltage applications.

What is a letop solar combiner box?

LETOP offers multiple series of solar combiner boxes, with each series specifically designed for specific installation conditions and common layouts. No matter under what conditions your solar project is used, it will become easier and more efficient. 600V DC combiner box is LETOP's economical solution designed for small PV systems.

What is a 1000v DC combiner box?

1000V DC combiner box is specifically designed for professional combining solutions. It supports 1-16 string inputs and 1-3 string outputs. The maximum support for 1000V DC system voltage. IP65/66 protection rating and optimized heat dissipation design ensure your system operates reliably in complex environments.

How many string configurations can a combiner box support?

The combiner box supports a maximum of 24 string configurations, it is suitable for 1500V DC system voltages. It features industrial-level protection design, including string monitoring, RS485 bus/standard MODBUS-RTU protocol, arc fault detection, and fast shutdown/fireman switch functions.
