Marseille New Energy Storage Project

Overview

How much does the port of Marseille Fos project cost?

The project represents an investment of €750 million, with the aim of avoiding 750,000 tonnes of CO2 emissions into the atmosphere every year. The Port of Marseille Fos, as an investor port, is participating in the capital of the project led by H2V, which aims to decarbonise port areas through a cleaner industry tailored to the needs of the region.

What is the H2V Marseille Fos project?

The H2V Marseille Fos project marks a significant milestone in the transition to green energy, with a substantial green hydrogen production unit set to be developed at the Port of Marseille Fos.

Why is Marseille Fos important?

As a key gateway to the south of Europe, it provides a vital alternative to the ports of Northern Europe. Spanning an area comparable in size to the city of Paris, the Port of Marseille Fos boasts extensive space and infrastructure, making it well-suited for maritime, logistics, and industrial activities.

What industries are in Marseille Fos?

Additionally, it hosts various industries, including refineries, the steel industry, and chemical processing. The Port of Marseille Fos is equipped with extensive ship-repair facilities, including nine dry docks, with "Dry Dock 10" being the largest in the Mediterranean.
