

# **Mercke uninterruptible power supply**

## Overview

---

What is an uninterruptible power supply (UPS)?

Uninterruptible Power Supply (UPS) | Schneider Electric Hong Kong, China. An Uninterruptible Power Supply system provides emergency power when the main source fails, using batteries to ensure a continuous supply. It conditions incoming power, protecting equipment from fluctuations. We offer various UPS power supply types for different needs.

Why are uninterruptible power supplies important?

In times of increasing relevance of decentral power supplies and decreasing reliability of the power supply networks, uninterruptible power supplies (UPS) become more and more important.

Are battery-backed uninterruptible power supplies reliable?

Reliability of power sources is an increasing challenge in many sectors and battery-backed uninterruptible power supplies (UPS) are one option to protect and keep electronic equipment operating in the event of grid power failure.

Why do you need a 3-phase UPS system?

It also serves as a reliable battery backup. A 3-phase UPS system is crucial in data centres, edge computing, and industrial applications where uptime and data integrity are vital. It protects servers, storage systems, networking equipment from power quality issues.
