

Microinverter size

Overview

How big is the microinverter market?

The three phase segment is anticipated to cross USD 800 million by 2034. The microinverter market size crossed USD 2.9 billion in 2024 and is estimated to grow at a CAGR of 10.6% from 2025 to 2034, driven by rising demand for plug-and-play solar systems.

What size microinverter do I Need?

Microinverters' small size is a defining feature for easier installation, after all. Microinverters are usually around 200–250 W in size. Larger microinverters will likely be more expensive, but a microinverter that is too small for the associated panel's energy output will result in too much clipping and wasted energy.

How big is the solar microinverter market in 2025?

The solar microinverter market is valued at USD 5 billion in 2025 and is projected to reach USD 26.77 billion by 2035, expanding at a CAGR of 18.3%. The string inverter segment is anticipated to grow fastest among product types, with a CAGR of 5.7%.

Are all micro inverters created equal?

Not all micro inverters were created equal, however. Here are our tips on what to look out for when selecting a microinverter. Microinverters come in different sizes, each designed to handle different voltages of electricity.
