

Moldova Outdoor Power Technology Company

Overview

How much electricity does Moldova produce?

The country produces only about 20 percent of its annual electricity consumption from natural gas-fired combined heat and electricity power plants. Moldova has one hydropower plant, the Costesti Hydropower Plant. Moldavskaya GRES (MGRES) in the separatist region of Transnistria supplies the vast majority of the remaining 80 percent of electricity.

Does Moldova have a new energy policy?

Moldova has committed to implement reforms embedded within the European Union's Third Energy Package, a suite of legislation adopted in 2009 aimed at creating integrated and competitive energy markets for natural gas and electricity.

Where does Moldova's power come from?

The remaining 70 percent of the country's power normally comes from a thermal power station in Moldova's breakaway Transdniestrian region, where Russian troops are stationed and which also cut deliveries.

How has Moldova restructured its electricity distribution network?

As part of the reforms, Moldova restructured and partially privatized its electricity distribution network, including Premier Energy, a private company that controls 70 percent of the country's electric distribution grid.

Moldova Outdoor Power Technology Company

Moldova

Mar 8, 2024 · Moldova's energy sector relies heavily on imports of electricity and gas. The country produces only about 20 percent of its annual electricity consumption from natural gas-fired ...
