Moldova Solar Powered Electricity System

Overview

How much energy does Moldova need in 2023?

This means that in summer CHPs are off, and the imports from Transnistria meet about 90% of the total domestic electricity demand. Committed renewable energy capacity in the Republic of Moldova by 2030 is expected to reach 700MW. In 2023, renewable energy generation met 10.5% of the energy demand, compared to 5.5% in 2022.

What is Moldova's national energy strategy?

To increase the level of clean and domestically-derived energy, Moldova established its National Energy Strategy(NES) for 2030, with three key objectives: Ensuring the security of supply of energy; Developing competitive markets and their regional and European integration; and Ensuring sustainability of the energy sector and climate change mitigation.

What is the electricity system like in Moldova?

The electricity system in Moldova is characterised by its reliance on imports. In 2020, of its 4.4 TWh of electricity demand, 81% was supplied by imports, either from Ukraine (4%) or from the Cuciurgani-Moldavskaya GRES (MGRES) gas-fired power plant (77%) located in the breakaway region of Transnistria.

What percentage of Moldova's electricity is renewable?

In 2020, renewable electricity accounted for just over 13% of domestic generation in Moldova. Moldova's deployment of wind and solar power has been modest, though, and there remains over 27 GW of potential renewable generation capacity via wind, solar, biomass and hydro.
