

# Mozambique Solar Transformation

## Overview

---

Mozambique is set for a solar revolution, with multi-million-dollar investments set to help diversify the energy mix. Over recent years, Mozambique has hit headlines for major natural gas discoveries. Does Mozambique have solar energy?

However, Mozambique has great potential for solar energy, with average annual temperatures between 20°C and 30°C and a significant solar irradiance of 5 to 6 kWh/m<sup>2</sup>/day . .

Does Mozambique need a hybrid solar-wind system?

This paper presents a comprehensive analysis of Mozambique's energy transition, focusing on integrating a hybrid solar-wind system with green hydrogen storage. It discusses Mozambique's renewable energy potential, particularly in solar and wind, and the country's efforts to meet increasing energy demands sustainably.

How can policymakers improve Mozambique's energy matrix?

With this knowledge, policymakers can implement measures to diversify Mozambique's energy matrix, reduce greenhouse gas emissions, and ensure a smoother energy transition, as highlighted in the study by Nhambiu & Chichango (2024a).

Who is building a solar power plant in Mozambique?

The Spanish group TSK has won the contract to build the Cuamba solar power plant in the Niassa province of Mozambique.
