

New solar power storage plant

Overview

A 500 MW/2,000 MWh standalone battery energy storage system (BESS) in Tongliao, Inner Mongolia, has begun commercial operation following a five-month construction period, reflecting China's accelerating rollout of large-scale storage to firm and integrate high penetrations of wind and solar generation. Will Tesla build a grid-scale battery plant in China?

Photographer: Carla Gottgens/Bloomberg via Getty Images Tesla has signed its first deal to build a grid-scale battery power plant in China amid a strained trading relationship between Beijing and Washington. The U.S. company posted on the Chinese social media service Weibo that the project would be the largest of its kind in China when completed.

How many kilowatts can a Tesla Megapack store?

Tesla's energy storage plant in Shanghai's Lin-gang Special Area commenced operation on Feb 11, as the assembly line started the production of the first Megapack unit. The Megapack, which is an advanced battery system designed for large-scale energy projects, can store more than 3,900 kilowatt-hours of electricity in a single unit.

Will Tesla install a Megapack solar array at Giga Texas?

In the United States, Tesla has already installed a similar setup at Giga Texas, where a massive rooftop solar array spells out the word 'TESLA' and is complimented by a Megapack installation with 131MW of power capacity and 262 MWh of power storage capacity.

How much power does a battery storage system have in 2023?

Capacity for global battery energy storage systems rose 42 gigawatts in 2023, nearly doubling the total increase in capacity observed in the previous year, according to the International Energy Agency. — CNBC's Arjun Kharpal contributed reporting.
