

# **Nigeria Lagos solar Bifacial Module Company**

## Overview

---

What is a bifacial solar panel?

They can be thus said to be 'monofacial'. As is directly implied in the name, a bifacial solar panel is a solar module that is constructed in such a way to expose both the front and backside of the solar cells to sunlight so as to produce electricity from both sides of the panel.

Are bifacial solar modules a disruptive trend?

Bifacial modules have been around since the 1960's, however it was with the recent development of the Passivated Emitter Rear Cell technology that has significantly increased their efficiencies and expanded their potentials, that they recently became the disruptive trend in the solar module market.

Why should you choose GeNNex Solar Company in Nigeria?

As a solar company in Nigeria whose sole business is solar, we know the importance of uninterrupted power to Nigerians and we are here to ensure that you get only the best. Gennex team of experts have executed a complete solar system that powers Petrocam's entire petro station electricity need all day.

Are solar panels 'monofacial'?

Traditional solar panel modules have a transparent top side that has an arrangement of solar cells that produce the electricity and a bottom side that is mostly made of an opaque polymer backsheet to which a junction box is attached. They can be thus said to be 'monofacial'.

## Nigeria Lagos solar Bifacial Module Company
