

Number of 5G base stations of each telecommunications company

Overview

What is the global 5G base station market size?

The global 5G base station market size was estimated at USD 33,472.5 million in 2023 and is projected to reach USD 253,624.3 million by 2030, growing at a CAGR of 33.5% from 2024 to 2030. The surging demand for high-speed connectivity is a significant factor driving the growth of the 5G base station market.

How many 5G radios are there in India?

The number of 5G radios in India just crossed 100,000 according to latest data released by the Department of Telecommunications. A base station generally manages multiple radios so not sure how many base stations would be there for 5G and even for older Gs.

How many 5G base stations are there in the United States?

While China leads in sheer numbers, the U.S. is making steady progress. By late 2023, the country had between 150,000 and 200,000 active 5G base stations. The deployment strategy in the U.S. is different from China's, as it relies on private investment rather than government-led initiatives. Is this article too long?

.

Why are telecom companies installing indoor 5G base stations?

To solve this, telecom companies are installing indoor 5G base stations, which are growing at a compound annual growth rate (CAGR) of over 30%. For businesses operating in offices, malls, or large commercial spaces, installing indoor 5G solutions can greatly enhance connectivity.
