

Outdoor power heating

Overview

Most patio heaters are either gas-powered (propane or natural) or electric. Both types emit infrared energy. Unlike a space heater, which blows air across a hot electric coil to warm the air, a patio heater projec.

Which outdoor heater should I buy?

If your landscape includes something close to a wall, a wall-mounted heater, like the Dr. Infrared Heater Carbon Infrared Outdoor Heater (our best wall-mounted pick), or a directional unit might be best rather than an omnidirectional heater. For larger open spaces, a propane pick like our overall best recommendation will do well.

What is a residential patio heater?

Most residential patio heaters look just like the commercial models you see at outdoor restaurants. They tend to have a wheeled base (a big plus if you want to move it around your space) and are powerful enough to warm areas of more than 300 square feet.

Should I buy an electric or Propane patio heater?

When choosing between an electric or propane outdoor patio heater, both have their pros and cons: Electric patio heaters are easy to set up, move around and most are safe to use in enclosed spaces like covered porches and garages.

Are Electric patio heaters safe?

Electric patio heaters are the safest option to keep your chilly patio warm and cozy all winter long. Electric heaters are available in freestanding or ceiling-mounted designs and use either electric heat or infrared rays to raise the brisk outdoor temps.
