

# **Payment for Low-Pressure Folding Containers Used in Wastewater Treatment Plants**

## Overview

---

After decades of rapid development, China has accomplished the transition of wastewater treatment from underdevelopment to an industrial powerhouse, and China's wastewater treatment has also developed.

What is a containerized wastewater treatment plant?

A containerized wastewater treatment plant is a wastewater treatment system that is fully integrated into a container. For uncomplicated and fast transportation, we use 10, 20 and 40-foot shipping containers in accordance with the international ISO standard for our KLARO container systems.

What are the advantages of a containerized wastewater treatment system?

Compact and portable: They require minimal space and can be easily transported wherever needed. A standard 20-foot container can hold a system capable of treating wastewater for dozens of people. Rapid deployment: Containerized systems are pre-assembled and ready to use upon arrival, perfect for disaster relief or temporary needs.

How is sewage transported from a property to a treatment facility?

When it comes to wastewater management, there are a few methods through which sewage is transported from properties to treatment facilities. The three most commonly used methods around the world are gravity, vacuum, and low-pressure sewer systems.

What is a containerized wastewater system?

Rapid deployment: Containerized systems are pre-assembled and ready to use upon arrival, perfect for disaster relief or temporary needs. Simply connect the system to the power and water supply, and it's operational. Scalable: Multiple containers can be interconnected to handle larger wastewater volumes when needed.
