

# **Percentage of revenue from Brunei s solar container energy storage system for peak load shaving and valley filling**

## Overview

---

How much solar power does Brunei have?

They are designed with large rotor blades and higher hub heights (>100m) to capture larger amount of energy at same rated power. Brunei's current installed Solar capacity is 4.63MW, with 60MW additional planned by 2024 and a target to reach 300MW by 2035.

Why is Brunei focusing on developing downstream energy industries?

The country is focusing on developing downstream energy industries by maximising economic spin-of potential from upstream production and assets. Brunei Darussalam aims to reduce its energy intensity by 45% in 2035 from the baseline year of 2005, in line with its regional commitment to the Asia-Pacific Economic Cooperation.

Will Brunei achieve a 30% renewable capacity target by 2035?

As per the Brunei National Climate Change Policy (BNCCP), Brunei aims to achieve a target of 30% of renewables capacity in the electricity mix by 2035, equivalent to 300MW. The majority share of the target is planned from utility-scale PV solar (250MW) and distributed solar (50MW).

Can Brunei be a solar power hub?

Brunei has floating solar potential of ~2.3 GW which presents an opportunity both for use in the electricity grid as well as for green hydrogen production. Adding 500MW of this potential to the grid would lead to increase in Solar PV penetration to 30%.
