Portable solar panel prices in Victoria

Overview

The average cost of installing a 6.6kW solar system in Victoria in 2025 ranges from \$3,800 to \$4,800 after rebates. How much do solar panels cost in Victoria?

One of the primary concerns when considering solar panels is the upfront cost of installation. In Victoria, the cost of installing solar panels can vary depending on several factors, including the size of your solar system and the quality of the panels. On average, a 6.6kW solar panel installation can cost between \$4,000 to \$10,000.

How much does a solar PV system cost in Australia?

These prices include the STC discount (Renewable Energy Target incentive) and GST, representing the total retail cost to the customer. A commonly sized 6kW Solar PV System would cost between \$4,000 and \$6,000 in most states in Australia, while a 10kW system typically falls between \$7,500 and \$10,500.

Why are there so many solar installers in Victoria?

With the great benefit of solar panel systems with the state government rebates, more and more of the homes in Victoria are opting for solar power. This has resulted in a steep increase in the demand of solar installers in Victoria. The concentration of solar systems is mainly seen along the coastal line of Victoria starting around Melbourne.

Are there rebates for solar panels in Victoria?

Fortunately, Solar Victoria offers numerous rebates through its Solar Homes Program, which can drastically reduce upfront solar panel costs in Victoria for eligible households. These include rebates for solar panels, hot water systems, and even interest-free loans.
