

# **Prague Fire Station Uses Energy Storage Containers for Communication**

## Overview

---

Why do we need a charging station in the Czech Republic?

“We believe that this type of charging station will contribute to developing the charging infrastructure in the Czech Republic thanks to its ability to compensate for the lack of electricity quickly and without taking up much space.

Who makes the first EV charging station in the Czech Republic?

It is the first of its kind in the Czech Republic. The charging station was supplied by Kreisel Electric from Austria. The charging station with the model name Chimero 180 from Kreisel Electric can charge EVs with up to 180 kW and is intended for locations with insufficient grid capacity.

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

How can a mobile energy storage system help a construction site?

Integrate solar, storage, and charging stations to provide more green and low-carbon energy. On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions.
