

# **Ranking of solar container communication station wind power production enterprises**

## Overview

---

Does S&P Global Ratings own wind & solar assets?

This article was published by S&P Global Commodity Insights and not by S&P Global Ratings, which is a separately managed division of S&P Global. Net additions of global top owners' wind and solar assets reached a record high of 113 GW by Jan. 1, 2023, marking a 28% growth from the previous year.

How many wind and solar assets are there in 2023?

Net additions of global top owners' wind and solar assets reached a record high of 113 GW by Jan. 1, 2023, marking a 28% growth from the previous year. Collectively, global top 30 asset owners held 626 GW of solar and wind assets, accounting for 32% of the world's total.

Which irradiance has the highest PCC with the power output?

Similarly, in the solar dataset, total solar irradiance has the highest PCC with the power output, as shown in Fig. 6. Pearson correlation coefficient of different variables of the wind farms.  $WS_x$  (i.e., wind speed at different heights) has the highest PCC with respect to power.

Can on-site solar and wind generation data be used for forecasting?

Solar and wind generation data from on-site sources are beneficial for the development of data-driven forecasting models. In this paper, an open dataset consisting of data collected from on-site renewable energy stations, including six wind farms and eight solar stations in China, is provided.
