Rwanda container energy storage raw materials

Overview

Does Rwanda have a tin smelting plant?

Rwanda also has the only active tin smelting plant in Africa. For the EU, this partnership will contribute to ensuring a sustainable supply of raw materials, especially critical raw materials, as an essential prerequisite for delivering on green and clean energy objectives.

What is Rwanda's mineral value chain?

Background Mineral value chains are critical to Rwanda's economy. The country is a major player on the world's tantalum extraction. It also produces tin, tungsten, gold and niobium, and has potential for lithium and rare earth elements.

What is the EU-Rwanda critical raw materials partnership?

Transparency, traceability and investment are at the core of the EU-Rwanda critical raw materials partnership." "Global Gateway provides the frame for ambitious and strategic partnerships driving structural transformation and promoting added value like this partnership on raw materials value chains with Rwanda.

Why is EIB partnering with critical raw material partners in Rwanda?

The collaboration aims to address the growing global demand for critical raw materials, including base metals, battery materials, and rare earths. EIB Global technical and financing teams will increase cooperation with critical raw material partners to explore new investment opportunities in Rwanda.
