Will San Jose create its own power utility?

Will San Jose PG&E get a municipal utility?

San Jose city leaders had sought to improve the delivery of electric services for years before the City Council approved exploring a municipal utility last year. With a massive chunk of PG&E's budget allocated toward wildfire mitigation, concerns started to mount over delays or cancellations of housing, hospital, and renewable energy projects.

Is San Jose power worth the investment?

But city leaders say the creation of San Jose Power is purely in an exploratory phase, and will still need years of research to determine if a publicly owned and operated power utility is worth the investment. The city's initial early study estimates 15% to 25% cost savings on electricity.
