

Sao Paulo Brazil exports solar modules

Overview

How many solar modules did Brazil import in the fourth quarter?

The fourth quarter broke records with over 5GW of imports, as noted by Greener, a local solar analysis and advice company—that's the most Brazil ever saw in three months. From November to December, China shipped nearly 4GW of solar modules to Brazil, becoming a huge part of Brazil's import activity.

Does Brazil have a solar industry?

In 2023, amidst global economic ups and downs and changing energy demands, Brazil saw a tiny dip in its solar module imports—17.5 gigawatts (GW), just 0.3GW less than the year before. Despite this small drop, the solar industry has grown a lot, showing Brazil's dedication to clean energy and its prospects for getting even bigger.

Does China Import solar panels to Brazil?

From November to December, China shipped nearly 4GW of solar modules to Brazil, becoming a huge part of Brazil's import activity. This surge highlights how global the solar industry is and how much Brazil counts on Chinese production to reach its green energy goals.

How much solar power does Brazil have?

In the last five years, Brazil has increased its solar photovoltaic energy generating capacity by more than 6-fold. In 2020, the country's installed solar PV capacity stood at 8.5 gigawatts. By the end of 2024, this had grown to roughly 53 gigawatts.
