## Overview

---

How much solar power does Saudi Arabia have?

The country currently has around 190 MW of installed solar capacity, according to Apricum. In May, Saudi Arabian developer ACWA Power won a bid to develop 110 MW of floating solar in water reservoirs, 50 MW on the island of Sumatra, and 60 MW on Java.

Can Saudi Arabia supply its electrical needs solely with solar power?

Saudi Arabia has the potential to supply its electrical needs solely with solar power. [citation needed] As the largest oil producer and exporter in the world and one of the largest carbon dioxide producers Saudi Arabia would set an important precedent in renewable energy by shifting to solar power.

Why is Saudi Arabia deploying solar energy?

Saudi Arabia is deploying solar energy at a faster rate than any country in history. This new, clean electricity will not only decarbonize the country's grid, but it will also help to decarbonize the factories and transport systems of Europe and the Far East, by producing and exporting green hydrogen made from water and renewable electricity.

Does Saudi Arabia have a solar-research station?

In 2011, The United States and Saudi Arabia jointly set up a solar-research station in Al-Uyaynah village. The village, located about 30 miles northwest of Riyadh, had no electric supply at the time. The station is operated by the King Abdulaziz City for Science and Technology.
