

Solar Bottle Cycle System

Overview

What is a solar-powered water bottle?

And there we have it—our completed solar-powered bottle that sterilizes its contents using ultraviolet light rays, providing an efficient and sustainable solution for clean drinking water. By harnessing solar energy, the bottle is both renewable and self-sufficient, making it ideal for areas without reliable access to electricity.

How does a solar-powered UV sterilization water bottle work?

Our solar-powered UV sterilization water bottle is engineered to harness solar energy efficiently to purify water. The bottle features a 6V, 80mA solar panel on its top, capable of generating 480mW of power. This energy is utilized to power two UV LEDs situated at the bottom of the bottle's cap, each contributing to the sterilization process.

What is solar bottle lamp?

Solar Bottle Lamp is a solar-powered light that is constructed from waste plastic bottles. The design idea is to reuse waste plastic bottles. This project was created on 05/02/2022 and last updated 2 years ago.

How do daytime bottle lights work?

The organization pairs daytime bottle lights with nighttime LED systems powered by small solar panels and secondhand batteries. During daylight hours, one bottle inserted through a roof provides light equivalent to a 55-watt bulb by refracting sunlight through the water.
