

# **Solar container lithium battery bms maintenance in Rotterdam the Netherlands**

## Overview

---

Why is SK TES launching a new battery recycling facility in Rotterdam?

The newly established Rotterdam facility signifies a significant investment in meeting the needs of the electric vehicle (EV) and battery production markets. September 9, 2024, Rotterdam, NL. – SK Tes, a global leader in battery recycling solutions, is proud to announce the opening of its state-of-the-art battery recycling facility in Rotterdam.

What is a lithium battery management system (BMS)?

It is essential to highlight the indispensable role of a high-quality BMS in the overall performance and durability of a lithium battery. A Battery Management System is more than just a component; it's the central nervous system of a lithium battery.

What are the transport rules for lithium-ion batteries in the Netherlands?

The following rules apply to the transport of lithium-ion batteries within the Netherlands: ADR: ADR (Accord européen relatif au transport international des marchandises dangereuses par route): Transport must comply with this European regulation, with specific requirements for packaging, labeling, and documentation.

What is the demand for lithium ion batteries in the EU?

According to McKinsey (2023), demand for lithium-ion batteries in the EU will reach 1.1 TWh in 2030, accounting for about 23.4% of global demand. Supply is projected at 1.25 TWh, or 19% of global supply. Notably, Germany has seen investments in new battery production facilities totaling 552 GWh.
