

Solar container outdoor power 2Kwh

Overview

How much power does a 2KW Solar System produce?

Our 2 kW solar systems feature DIY solar kits, which will produce at least 2kW (or 2,000 watts) of power. This translates to approximately 175 to 375 kilowatt-hours (kWh) per month depending on your system choice, location and other factors. Choose between a 2kW solar kit with microinverters and a 2.4kW off-grid kit.

How much space does a 2KW Solar System need?

A 2kW solar kit from GoGreenSolar requires about 107 square feet of space. Solar panels with microinverters allow you to place panels in various locations, directions and angles on your roof. This choice will offer you more flexibility if space is at a premium.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.

Why should you choose a solar storage container?

Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy. Lower energy/maintenance costs ensure operational savings.
