# Solar container packing

## Overview

---

### Why do solar panels need packaging?

Solar panels reaching the customers broken, cracked, deformed, or scratched as a result of improper packaging are not only annoying but also costly. With panels having left the factory in good quality conditions but being damaged on the way, claims and disputes may come up quickly. This brief article is an introduction to solar panel packaging.

### How can reusable packaging help solar and electrical companies?

We help solar and electrical companies reduce waste, streamline operations, and save money through reusable packaging solutions. From robust reusable packaging options like collapsible bulk bin containers and solar panel pallets to custom packaging, we believe in win/win solutions that are better for people and the planet.

### How are solar panels packed?

Solar panels are typically either horizontally or vertically stacked in a box. Usually, separators are placed between each module, and extra protections are added to the four corners of each module stack. In some cases, modules are also packed in individual cartons boxes to be packed into a large master carton box.

### How to install a shipping container solar lighting system?

12V LED Light Strip. With these parts on hand we can create and install the shipping container solar lighting system. The solar panel will be installed on the roof of the container. The battery and charging controller will get installed inside the container.
