

Solar panels installed on tile roofs in Osaka Japan

Overview

How many types of solar panels are there in Japan?

There are two types of solar panel systems in Japan: Domestic Systems (under 10kW): Uses the electricity that was generated and sells the excess.
Commercial Systems (over 10kW): All generated electricity is sold and can not be used for personal consumption.

Are solar panels required in Tokyo?

All new detached houses in Tokyo after April 2025 are required to have solar panels installed. However, if you are purchasing a property in a different part of Japan, it's possible that solar panels may not be mandated in the region.

How much do solar panels cost in Japan?

The government encourages new detached houses to install solar panels, and subsidies greatly help reduce the costs of installing solar panels. Currently, the average price for a solar panel in Japan ranges from 200,000 to 400,000 yen per kilowatt (kW). Are there subsidies for installing solar panels in Japan?

.

How many kW is a solar panel in Japan?

5kW is the national average for installing solar panels in a home in Japan. The amount varies depending on the region and the property's roof size. The maximum for a household is 10kW. Do I need a storage battery with solar panels?

While not necessary, storage batteries are highly recommended.

Solar panels installed on tile roofs in Osaka Japan

[Pitched Tile Roof Solar Roof Mounting System in Japan](#)
