Solar power generation efficiency of bifacial modules

Overview

Do bifacial PV modules increase energy generation?

Experimental analysis of the increases in energy generation of bifacial over monofacial PV modules. In Proceedings of the 26th European photovoltaic solar energy conference , pp. 3140-43. Castillo AJ and Hauser P (2016). Multi-Variable Bifacial Photovoltaic Module Test Results and Best- Fit Annual Bifacial Energy Yield Model, IEEE Access.

What are bifacial photovoltaic (PV) modules?

EPJ Photovolt. Soufiane Ghafiri^{1,2,3*}, Maxime Darnon², Arnaud Davignny¹, João Pedro F. Trovão³ and Dhaker Abbes¹ Bifacial photovoltaic (PV) modules, capable of capturing solar energy from both sides of the cells, are becoming increasingly popular as their manufacturing costs approach those of traditional monofacial modules.

What are bifacial and monofacial solar cells?

Front and rear view of monofacial and bifacial photovoltaic (PV) modules . Bifacial solar cells encased in a glass/backsheet structure provide more power under standard test conditions (STC) than glass/glass PV bifacial modules.

Do bifacial solar cells provide more power?

Bifacial solar cells encased in a glass/backsheet structure provide more power under standard test conditions (STC) than glass/glass PV bifacial modules. However, glass/glass PV modules with bifacial solar cells deliver extra power in outdoor settings due to absorption from the module's rear side.
