

MODERNIZATION SOLAR

Somaliland Power Storage

Overview

What is the power capacity of Somalia?

Somalia's capacity to generate and transmit power is largely weak and ineffective. As of 2020, the total estimated installed capacity in the major load centers of the country was about 138 MW which is inadequate to serve current and future demand.

Is the electricity regulator established in Somalia?

In addition to the state level environmental policies and regulations. Regarding a follow-up question on the existing Somali electricity regulation; the PIUs has responded that the electricity regulator is not established, currently the Ministry of Energy and Water Resources exercises this mandate to act as a regulator.

What are the components of Mogadishu solar project?

The project will invest in the following: Component 1: Distributed Renewable Energy (DRE) with Solar PV(SPV) and Battery Energy Storage Systems (BESS) in the capital city of Mogadishu and other major load centers in the Federal Members States (FMS).

Who will implement the project in Mogadishu & Somaliland?

In response to this question, the Project Coordinator has elaborated the overall project implementation arrangements and stated the fact that the project will be implemented by the MoEWR, FGS in Mogadishu and Somaliland Ministry of Energy in close coordination with the FMS, ESPs and the other line Ministries such as planning and Finance.
