# Southern Europe Battery Pack Factory

## Overview

---

What is happening in the European battery industry?

The European battery industry has witnessed significant growth in recent years, with major European battery manufacturers like LG Chem, Continental AG, and Exide Technologies investing heavily in new battery factory projects.

How does a battery company promote Europe's battery production independence?

It aims to promote Europe's battery production independence by using renewable energy for sustainable battery manufacturing. The company focuses on lithium-ion battery production and is developing high energy density and long-lasting battery technology.

Where is Norway's first LFP battery factory?

Morrow Batteries has launched Norway's first battery cell production site on the south coast, marking Europe's first gigawatt LFP (lithium iron phosphate) factory. The start-up, founded in 2020, plans to deliver its initial units by the end of the year and gradually scale up production.

How many battery factories are there in Europe?

This, coupled with the ongoing competition with China, is why it is anticipated that around 250 battery factories will be established in Europe over the next ten years. By the end of last year, approximately 20 projects had been confirmed in European states such as France, Germany, Italy, and the United Kingdom.
