

MODERNIZATION SOLAR

Stocking up on solar panels

Overview

How much does a solar panel system cost?

A solar panel system even increases the value of your home by about 5-10% on average, based on a recent study by SolarInsure. If you pay for solar upfront, you'll spend about \$29,649 before any available incentives. Many states, towns, and utility companies offer incentives and rebates that can significantly lower your upfront costs.

Should you install solar panels on your home?

Installing solar panels on your home can significantly lower your electricity bill, raise your property value and reduce your carbon footprint. The biggest downside to going solar is how much it's going to cost.

Can solar panels save you money?

Solar panels: A bright idea that might save you money. Federal and (depending on where you live) state incentives make installing solar panels on the roof of your house a fairly affordable, money-saving home improvement project.

How do I get a great deal on solar panels?

The best way to get a great deal on your solar panel system is to compare quotes based on cost, equipment, and installer reputation. Historically, many solar shoppers only received one solar quote from a door-to-door salesperson or a cold call. But how can you feel confident in your solar decision if you only see one quote?
