# Swiss Hydrogen Energy Site

## Overview

---

Where is the first green hydrogen production plant in Switzerland?

26.04.2024 - Axpo and electric utility Rhienergie opened the first green hydrogen production plant in Switzerland's Graubünden canton, it was announced today. The facility, the country's largest, is located next to the Reichenau hydropower plant in Domat/Ems and can produce up to 350 tonnes of green hydrogen a year.

What is Switzerland's 2024 Hydrogen strategy?

Switzerland aspires to leverage green hydrogen as a cornerstone of its energy transition and global climate goals through international cooperation, research, and strategic investments. Switzerland's 2024 hydrogen strategy outlines the role of hydrogen as a key energy carrier in achieving the country's climate neutrality goals by 2050.

What is the future of hydrogen infrastructure in Switzerland?

The hydrogen infrastructure is to be developed along the entire value chain (production, conversion, transport, storage and refueling infrastructure) and Switzerland is to be strengthened as a location for education and innovation through the development of the necessary technologies.”.

How will Switzerland meet its hydrogen demand by 2035?

By 2035, Switzerland plans to meet its hydrogen demand through domestic production co-located with renewable electricity generation facilities or directly at large consumption sites.
