

Syria exports energy storage cabinets

Overview

What if Syria doesn't have reliable energy supplies?

The lack of reliable energy supplies is a major concern for Syrian citizens and its new government, making it a key point of leverage. Qatar and Türkiye have stepped in to provide short-term assistance. The two states have provided two floating power stations, while Türkiye is also connecting its grid to Syria.

Should the EU support energy generation in Syria?

In the short to medium term, it should support energy generation in Syria, especially in renewable electricity. In the longer term, it should offer Syria a role in an interconnected Eastern Mediterranean energy hub with independent access to the EU market for gas and electricity.

Should Syria become an energy hub?

In the longer term, it should offer Syria a role in an interconnected Eastern Mediterranean energy hub with independent access to the EU market for gas and electricity. For more than a decade, Syrians have been coping with severe energy shortages. Years of war and division have crippled over 50% of the country's electricity grid.

Is Syria's energy system in ruins?

Syria's energy system is in ruins. To rebuild energy security the country's new government faces two major challenges. The first, vital for Syria's swift recovery and political stability, is bringing reliable flows of electricity and fuel to its people.
