

# Taiwan Energy Storage Power Station Project

## Overview

---

Where is Taipower launching a 60 MW energy storage system?

Now, Taipower has launched another heavyweight 60-MW energy storage system at the Dongshan site in Yilan.

Which energy storage system in Taiwan can measure system inertia?

Furthermore, Taipower has introduced Function of Periodic Power Modulation (FPPM) technology at the Dongshan energy storage system, making it the only energy storage system in Taiwan capable of measuring system inertia.

Which energy storage technology providers are active in Taiwan?

Several energy storage technology providers, such as Fluence, flow battery manufacturer Invinity and NHOA, are active in the market. It is worth noting that the Taiwan energy storage market is set to become a focus for Billion Electric with plans to develop 1.2GWh local battery system production capacity.

How many MW will Taipower have in 2025?

A Taipower representative stated that the government's 2025 goal of establishing 1,500 MW of energy storage includes 500 MW from private developers integrating energy storage with photovoltaic power, 160 MW of energy storage systems built by Taipower, and an additional 1,000 MW from private resources aggregated through the Energy Trading Platform.

## Taiwan Energy Storage Power Station Project
