

# **Tanzania household energy storage**

## Overview

---

How much electricity is available in Tanzania?

Lastly, according to a National Bureau of Statistics (NBS) Study Report of 2019/2020, overall electricity access in Tanzania has increased from 14.2 percent in 2011 to 78.4 percent in 2020; and according to Tracking SDG7, electricity connectivity in Tanzania stood at 46 percent in 2022.

How many villages in Tanzania will be able to access electricity?

electricity access for 37 villages in Tanzania along the transmission line. Project comprises of 1) Construction of 49.5 MW hydropower plant, 2) 132 kV transmission line, 54 km long for power evacuation to the national grid, and 3) Distribution network expansion including rural electrification and last-mile connections.

How can Tanzania improve access to modern cooking?

Tanzania has demonstrated its commitment to addressing the long-standing need to improve access to modern cooking through strong political leadership and the preparation of the National Clean Cooking Strategy (NCCS 2024–2034), which estimated that about 6.9 percent of Tanzanians had access to clean and improved cooking solutions in 2021.

Can Tanzania achieve universal electricity access?

Tanzania has a tremendous opportunity to achieve universal electricity access by accelerating grid densification where power infrastructure exists and leveraging DRE solutions for extremely remote areas, particularly islands, where the grid is not feasible.
