

The latest acceptance standards for energy storage cabinets in Western Europe

Overview

What is the European Commission doing about energy storage?

The European Commission in 2020 published a study on energy storage, which summarized some previous studies and reports, explored current and potential energy storage markets in Europe, and set out policy and regulatory recommendations for energy storage.

How does energy storage work in the EU?

The main energy storage method in the EU is by far 'pumped storage hydropower', which works by pumping water into reservoirs when there is an electricity surplus in the grid - for example on a sunny or windy day - and releasing it when more energy is needed.

What is the European energy storage inventory?

In March 2025, the Commission launched the European Energy Storage Inventory, a real-time dashboard that displays energy storage levels across different European countries. It is the first European-level tool of its kind and offers energy storage data across a full range of technologies.

What is the energy storage global conference 2025?

The Energy Storage Global Conference 2025 organised by the Energy Storage Europe Association from 14–16 October, brought together industry stakeholders to discuss the latest developments in energy storage policies and markets, with an additional focus on the Benelux region.
