

# The most beautiful solar panel

## Overview

---

Which solar panels are best?

As far as aesthetic solar technology goes, SolarSkin by Sistine Solar is at the top of the list. It can be any color, match any roof style or pattern, making it the most suitable option for someone who wants a solar look specific to their home. SolarSkin is compatible with all other panel technologies mentioned previously.

What makes a solar panel beautiful?

There are a few elements that determine the beauty of solar panels: the color of the cells (the small squares within a panel that do the hard work of converting sunlight to electricity), the arrangement of the wiring between the cells, the color of the backsheet (the back covering on the underside of the panel), and the color of the frames.

Which solar panel is best for a slate roof?

For a truly all black panel the Sunpower Maxeon technology allows black backing with minimal affect on performance. A great solution for modern slate roofs as they blend in so well, looking very much like a Velux window. The creme de la creme of solar panel aesthetics, just one of the reasons Sunpower are so popular with consumers.

Do solar panels make your home look unattractive?

One of the biggest misconceptions about going solar is that solar panels will make your home look unattractive. While this may have been true of older solar panel models – which were typically bright blue with prominent grid patterns and visible wiring – the design of modern monocrystalline solar panels have changed the game.
