

Tiled Solar

Overview

Solar roof tiles are building-integrated photovoltaics that convert sunlight into electricity. They function similarly to traditional solar panels but are designed to blend seamlessly with your roof. What are solar tiles?

Solar tiles are roofing materials that can produce energy directly from sunlight. Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof.

What are volt solar roof tiles?

Volt solar roof tiles generate clean energy while preserving your home's design. The system replaces traditional roof tiles with solar technology that sits within the roofline. The result is seamless integration without visible panels or bolt-ons. Understand Volt. Paired roof tiles. Partner with Volt to bring solar roof tiles to your projects.

What is a solar roof tile system?

Simplicity, built in. Elevate your home with solar tiles that preserve design and deliver sustainable power. A Concealed solar roof tile system that generates clean energy without altering the design of your home. Volt is purpose-built for tiled roofs, making it ideal for new homes or premium re-roofing projects.

How do solar tiles work?

Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof. Photovoltaic cells in solar tiles turn sunlight into direct current (DC) energy.
