

MODERNIZATION SOLAR

Tunis City Photovoltaic Container Fast Charging

Overview

Despite the economic and environmental motivations promoting the growth of the electric mobility market worldwide, the rate of electric vehicles (EVs) adoption in developing countries is still very low. In this cont.

Is Tunisia launching its first solar PV charging station for electric cars?

Tunisia has inaugurated its first solar PV charging station for electric cars at the country's National Agency for Energy Management (ANME). This project includes a solar photovoltaic station with a capacity of 3kWp and storage batteries.

How many EV charging stations are there in Tunisia?

Deputy Director in charge of Energy Efficiency in the transport sector at ANME, Abdelhamid Ganouni, said that by 2025, Tunisia's goal is to increase the number of electric vehicles to 5,000. The country is also aiming to install 500 EV charging stations. Overall, current charging stations are mainly located in Tunis, Sousse and Nabeul.

Where is the first photovoltaic charging station for electric cars?

Tunis/Tunisia — The first photovoltaic charging station for electric cars was inaugurated on Friday at the seat of the National Agency for Energy Management (ANME).

How will ANME use a photovoltaic station?

This project, which includes a photovoltaic station with a capacity of 3 kWp, storage batteries and a 22 kW recharging point, will be used to recharge ANME's electric car, which is used to distribute the agency's mail and transport its staff to meetings.
