How does a DC UPS backup power system work?

[Click to Download UPS Spec Sheet](#) The Outdoor DC UPS Backup Power System utilizes a charge controller to convert high voltage AC power into DC power, which is then stored in the batteries. The power assembly then draws power from the battery storage, providing the appropriate output voltage and type.

What is a mobile solar PV container?

High-efficiency Mobile Solar PV Container with foldable solar panels, advanced lithium battery storage (100-500kWh) and smart energy management. Ideal for remote areas, emergency rescue and commercial applications. Fast deployment in all climates.

How does a UPS system work?

The UPS system is connected to high voltage AC shore power with three electrical butt connectors provided with each battery backup kit. This input voltage passes through an advanced charge controller to the UPS system's battery bank. Even when AC power goes out, your equipment stays online.
