

Vietnam 2025 Energy Storage Projects

Overview

What is Vietnam's energy development plan for 2045?

Vietnam's energy development plan for 2045, as outlined in the draft power development plan, includes foregoing the construction of any new coal-fired power plants. This would result in coal's share of the capacity decreasing to 9.5 percent by 2045, down from the previously projected 15 to 19 percent.

Does Vietnam have new feed-in tariffs for solar power?

April 2025 | Southeast Asia Impact Alliance Vietnam is taking another step toward modernizing its renewable energy sector by unveiling updated feed-in tariffs (FiTs) for solar power, with a notable emphasis on encouraging battery energy storage systems (BESS).

What are the new fits for solar power projects?

These updated FiTs aim to enhance grid reliability while aligning with the nation's broader energy transition strategy. The most significant development in this update is the introduction of differentiated tariffs for solar power projects that incorporate battery storage.

Does Vietnam have a long-term Power Purchase Agreement (PPA)?

Power producers will continue to sign long-term power purchase agreements (PPAs) with Vietnam Electricity (EVN), the state utility, under existing contractual frameworks. Vietnam's FiT scheme has been instrumental in driving clean energy development since its introduction.
