

# **Wellington solar Power Generation and Energy Storage Operation Project**

## Overview

---

The Wellington Energy Storage Photovoltaic Project, launched in Q1 2025, tackles this through a 600MW solar array paired with a 480MWh liquid metal battery system. Where is Wellington South Battery energy storage system being developed?

Wellington South Battery Energy Storage System is being developed in NSW, Australia. (Credit: Sungrow EMEA on Unsplash) The Wellington Battery Energy Storage System (BESS) is planned to be developed in the central west New South Wales (NSW), Australia. The project will comprise a grid-scale BESS with a total discharge capacity of around 400MW.

What is the Wellington Battery energy storage system (BESS)?

The Wellington Battery Energy Storage System (BESS) is planned to be developed in the central west New South Wales (NSW), Australia. The project will comprise a grid-scale BESS with a total discharge capacity of around 400MW. AMPYR Australia, a renewable energy assets developer in the country, owns 100% of the BESS project.

Where is the Wellington solar farm project located?

The project is directly south of the Wellington Solar Farm and adjacent and east of the Wellington Substation (see Figure 1.2). The solar panels and related infrastructure of the Wellington Solar Farm and associated grid and transmission infrastructure is a prominent visual feature in the surrounding landscape.

Will Wellington Bess be the largest battery storage project in NSW?

Once operational, it will have a capacity of 1,000-megawatt hours (MWh) of green power. This will make Wellington BESS one of the largest battery storage projects in NSW. Wellington is being constructed at 6773 and 6909 Goolma Road, Wuuluman NSW 2820.
