What are the parts of a solar system

Overview

What are the different parts of the Solar System?

Astronomers sometimes divide the Solar System structure into separate regions. The inner Solar System includes Mercury, Venus, Earth, Mars, and the bodies in the asteroid belt. The outer Solar System includes Jupiter, Saturn, Uranus, Neptune, and the bodies in the Kuiper belt.

What is the Solar System made up of?

The solar system is made up of all the planets that orbit the sun, but the solar system also has moons, comets, asteroids, minor planets, dust and gas; everything in the solar system actually orbits or revolves around the sun. The sun contains around 98% of all the material in the solar system.

How many planets are in our Solar System?

Pluto (lower right) and its biggest moon Charon (upper left). Composite of images taken by New Horizons on July 14, 2015. Image by NASA. Unless you're pretty young, you learned in school that our solar system consists of nine planets.
