

What battery cabinet factories are there in Vilnius

Overview

How much electricity does Lithuania use?

“Although the average electricity consumption in Lithuania is around 1,500 megawatts, the installed capacity of both solar and wind power plants is expected to exceed 2,000 megawatts in 2025, enabling surplus electricity to be stored and supplied to consumers during peak hours”, E energija group’s CEO Gediminas Uloza noted in a social media post.

When will Vilnius Bess become operational?

The Vilnius BESS is scheduled to become operational by the end of 2025. Partners in the project include Power Electronics and CATL - Contemporary Amperex Technology Co Limited, which will supply the energy storage equipment, and local BESS integrator Nord energija, which will provide its proprietary NordNest smart energy management system (EMS).

Where is Energija building a smart battery storage project?

Lithuanian renewables developer E energija group announced on Tuesday that it has started construction works on a 120-MWh smart battery storage project near the capital city of Vilnius. Author: Portland General Electric. License: Creative Commons, Attribution-NoDerivs 2.0 Generic.
