

What size solar system should I choose

Overview

How do I determine the right size of a solar system?

Learn how to determine the right size of a solar system for your home by considering factors like energy consumption, location, and roof orientation. Use our simple calculator to estimate your solar panel needs.

What size Solar System do I Need?

On average, most homes require a system between 5kW and 7kW, but this can vary widely. It's advisable to consult with a solar expert who can assess your specific needs and recommend the best system size for your home. Jeff has consulted on over 20MW of commercial solar projects, ranging from SMEs to ASX top 100 companies.

How important is solar sizing?

When it comes to solar system sizing, it's crucial to get it right. A properly sized solar system can help you reduce your energy bills, decrease your carbon footprint, and contribute to a sustainable future.

What is the best solar system size?

Using our solar system payback calculator, we have identified the optimal solar system for these two electricity usage scenarios. We can see that for 20kWh electricity usage under a morning and evening peak profile, the best solar system size is 6kW for return on investment. For the daytime focus electricity load profile, the best size is 6kW.

Step 1: Determine Your Average Monthly Kwh Usage
Step 2: Calculate Your Daily Kwh Usage
Step 3: Estimate The Amount of Sunlight Your Solar Panels Will Receive
Step 4: Account For Inefficiencies
Step 5: Full Or Partial Offset?
Step 6: Determine How Many Solar Panels You Need
Most grid-tie homeowners choose to offset 100% of their energy needs with solar. But it is also possible to start with a smaller system for partial offset, and then expand down the line

as the budget allows for it. If partial offset is your goal, you can account for that here. For example, let's say you want to start by offsetting half your energy See more on gogreensolar Location: 1630 South Sunkist Street Ste E, Anaheim, 92806, CaliforniaEcoFlow
